Base PLC-M12 v1.1

SKU:K011-B-V11

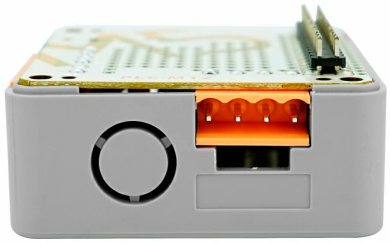

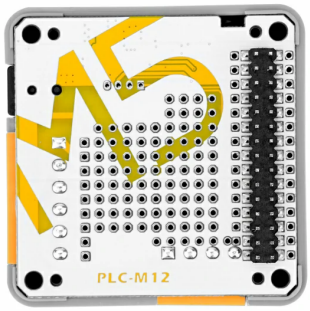

Description

Base PLC-M12 v1.1 is an industrial control base. It comes with an industrial-grade enclosure, designed specifically for industrial control applications. Unlike typical industrial PLCs (Programmable Logic Controllers), it features a more compact form factor, delivering essential industrial control functions while maintaining low power consumption. Based on the M5 development system, you can add any number of relay switches as needed, and it also supports TTL-RS485 communication. Functional module stacking is supported, such as stacking a LoRa

module to turn the PLC into a LoRa communication node. A PLC-Proto board is included for easy follow-up circuit expansion. With different hardware stacking and expansion designs, it can meet various customized needs for industrial-grade applications. **Base PLC-M12 v1.1** will be the perfect solution for industrial control projects.
