Unit Watering

SKU:U101

Description

Unit Watering is a capacitive soil moisture detection and regulation Unit. The product integrates a water pump and measurement plate for soil moisture detection and water pump control, applied in intelligent plant cultivation scenarios to conveniently achieve humidity detection and irrigation control. The measurement plate adopts a capacitive design, which, compared with resistive plates, can effectively avoid corrosion issues during actual use.

Features

- Capacitive measurement plate / More corrosion-resistant
- Integrated 5W water pump
- LEGO compatible holes

Includes

- 1 x Unit Watering
- 2 x Water suction tubes
- 1 x HY2.0-4P Grove Cable (20cm)

Applications

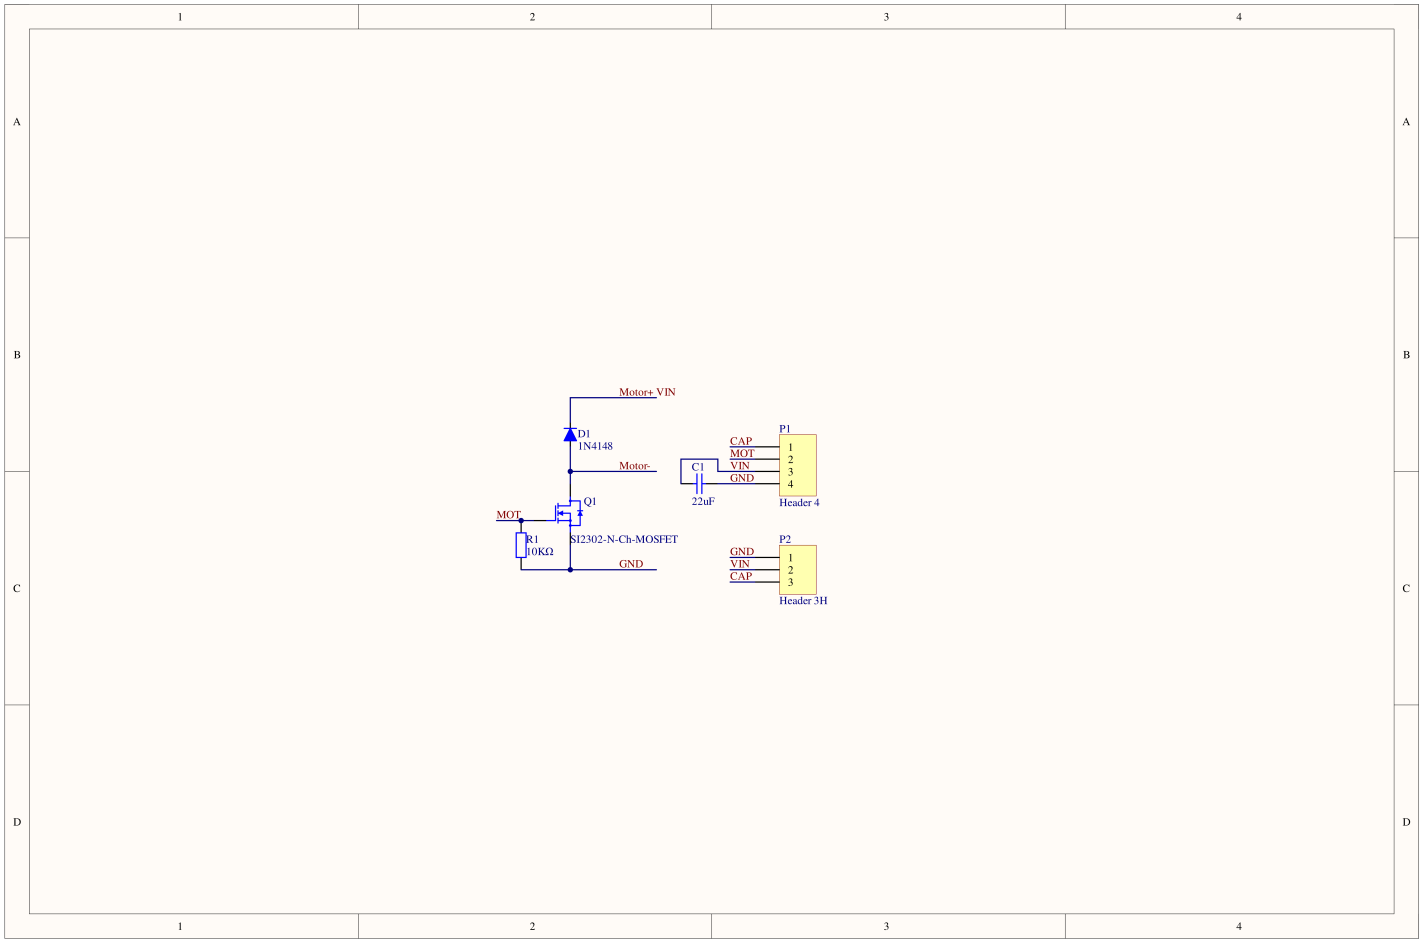

- Plant cultivation
- Soil moisture detection
- Smart irrigation

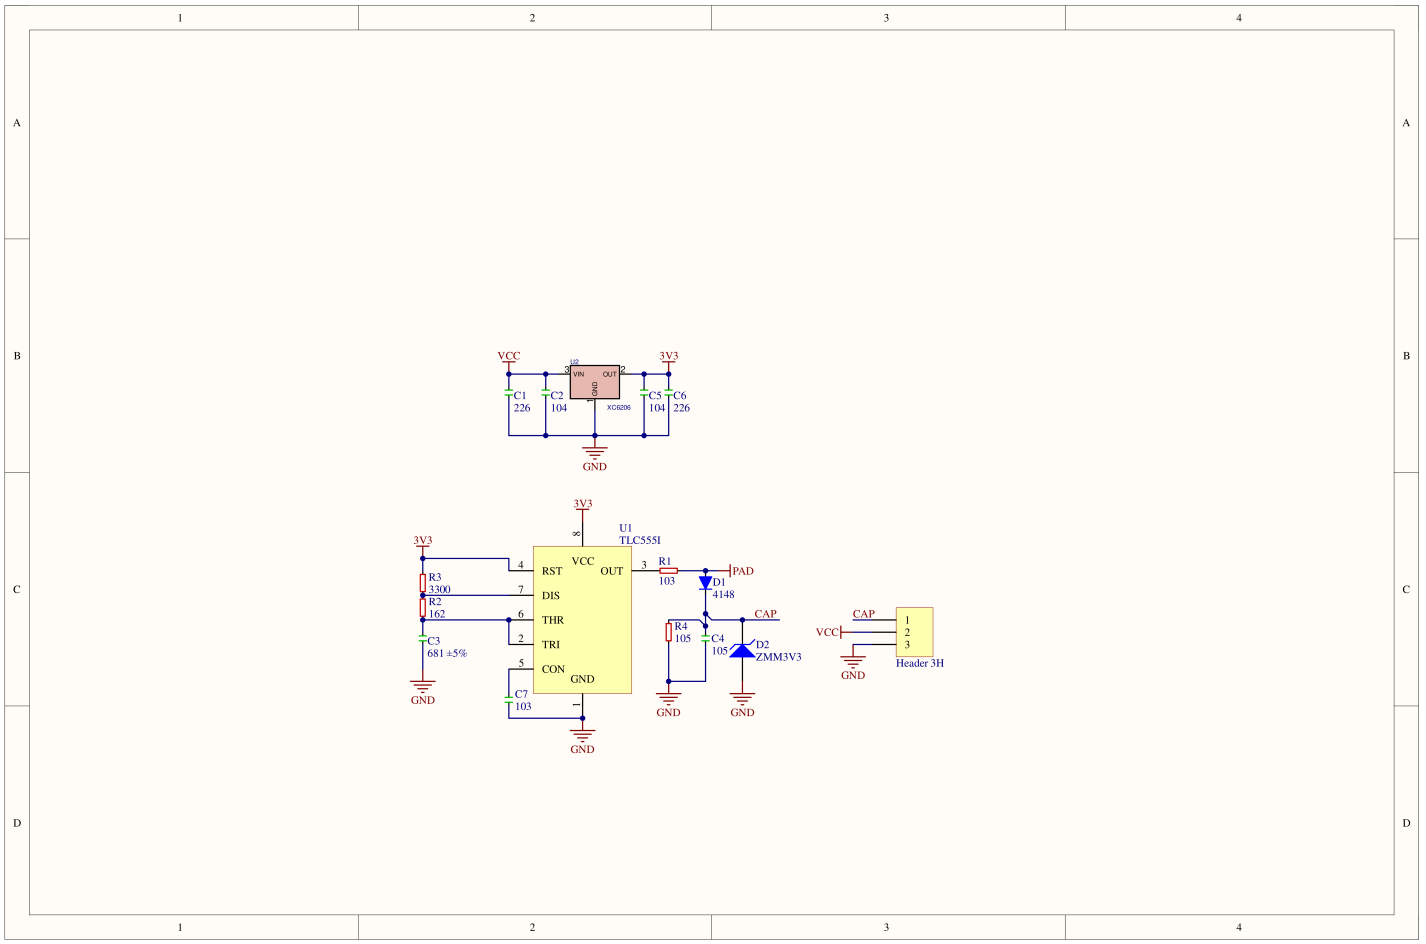

Specifications

Specification	Parameter
Pump Power	5W
Product Size	192.8 x 26.5 x 33.0mm
Product Weight	94.6g
Package Size	200.0 x 45.0 x 35.0mm
Gross Weight	114.2g
