Faces Joystick

SKU:A007

Description

Faces Joystick is a joystick control panel compatible with the FACE kit. By pushing the joystick on the panel, you can input data such as angles and directions. It communicates using the I2C protocol, allowing you to obtain the joystick's offset data (X, Y coordinates) and the state of the center button. Around the joystick, there is an LED bar composed of 12 LEDs, which you can customize according to your needs.

Features

- 4 RGB LEDs
- I2C communication (0x5E)
- Simple API interface

Includes

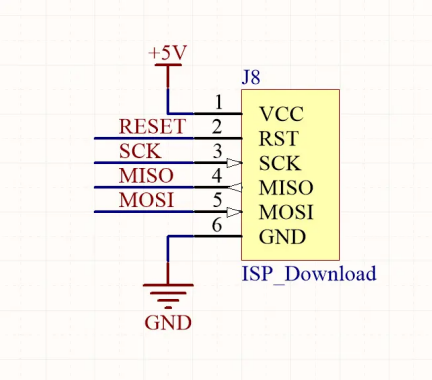

- 1 x Faces Joystick

Specifications

Specification	Parameter
Communication Port	I2C @0x5E
Product Size	58.0 x 54.0 x 10.0mm
Product Weight	22.0g
Package Size	95.0 x 65.0 x 25.0mm
Gross Weight	50.0g
