Module GoPlus

SKU:M025

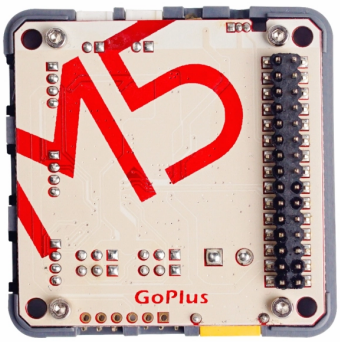

Description

Module GoPlus is a feature-enhanced module in the M5Stack stackable module series. It integrates the **MEGA328P** and **LV8548MC** motor driver chips, combining the functions of Module and Units (SERVO, PbHUB, IR). It is equipped with 2-channel DC motor drive, 4-channel servo drive interface, infrared transceiver, and 3 extended PORT B (GPIO ports). With a variety of functional features, it can help you quickly build powerful motor applications.

Features

- 2x DC motor drive channels
- 4x Servo drive channels
- IR transmitter & receiver
- 3x Extended PORT B
- MEGA328P
- LV8548MC
- Communication protocol: I2C (0x61)

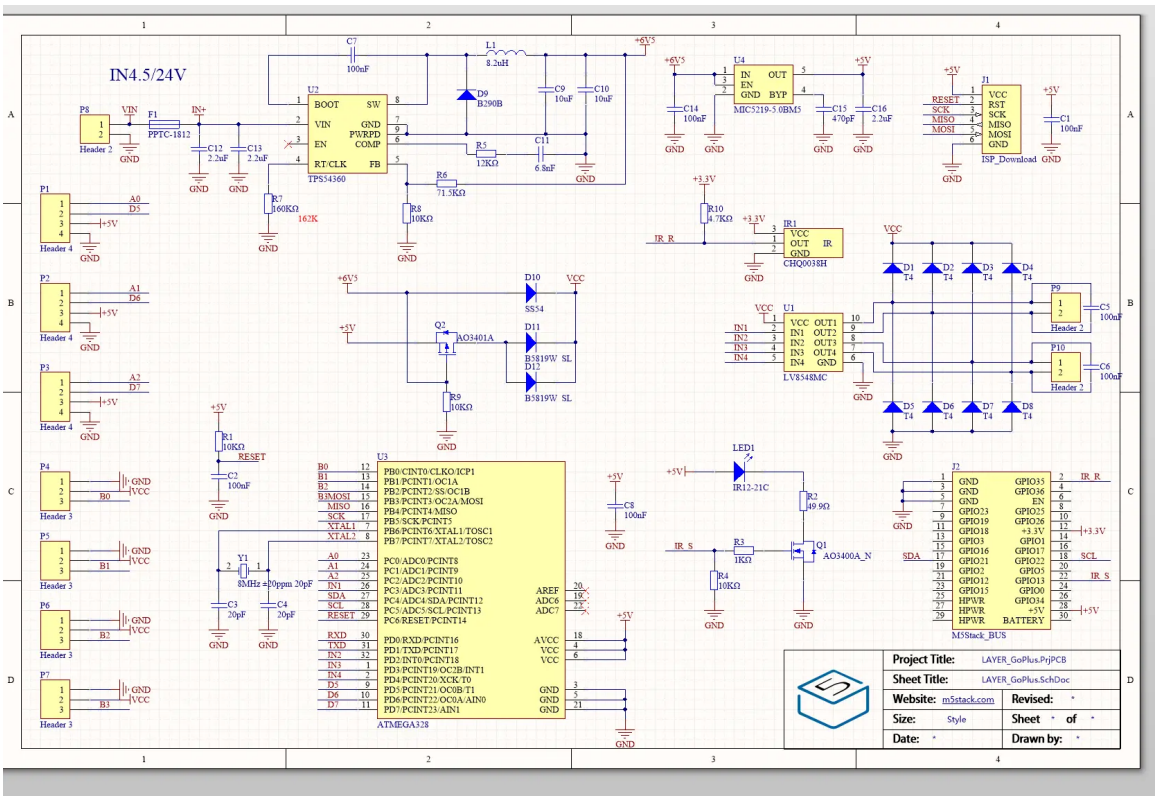

Includes

- 1 x Module GoPlus

Specifications

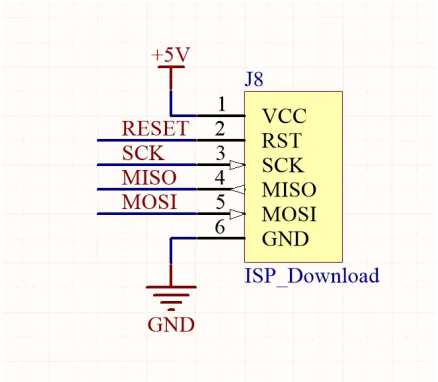

Specification	Parameter
Net Weight	28g
Gross Weight	43g
Product Size	54 x 54 x 13mm
Package Size	60 x 57 x 17mm
