# Tail Bat

SKU:T001

## Description

**Tail Bat** is an external battery accessory designed for ATOM. It can be plugged into the tail of the ATOM to directly power it, making it convenient for users to use in mobile scenarios. The Tail Bat features a switch button on the front and contains a 190mAh battery controlled by the power management chip IP5303. When the power is turned on, a red indicator light will illuminate. The usage method is the same as that of the M5Stack Core: single-click to turn on the power, double-click to turn off the power, the indicator light flashes during charging, and stays on when fully charged. Since the Tail Bat has a pass-through design for the interface while adding the battery, it does not affect the original wiring method and interface functionality. The built-in battery can only be charged via the Type-C interface and cannot be charged through the GROVE interface.

## Features

- Plug and play
- Built-in rechargeable lithium battery
- LED indicator

## Includes

- 1 x TailBat

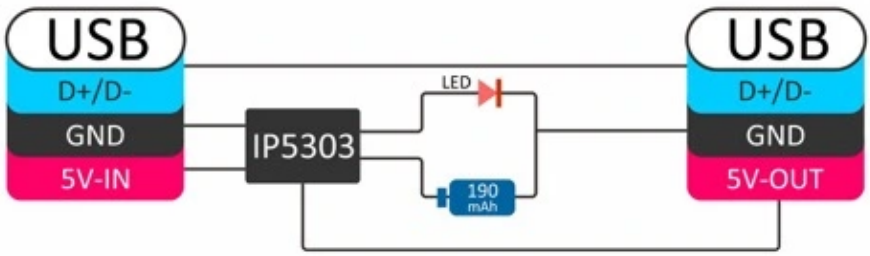

## Applications

- External mobile power supply for ATOM

## Specifications

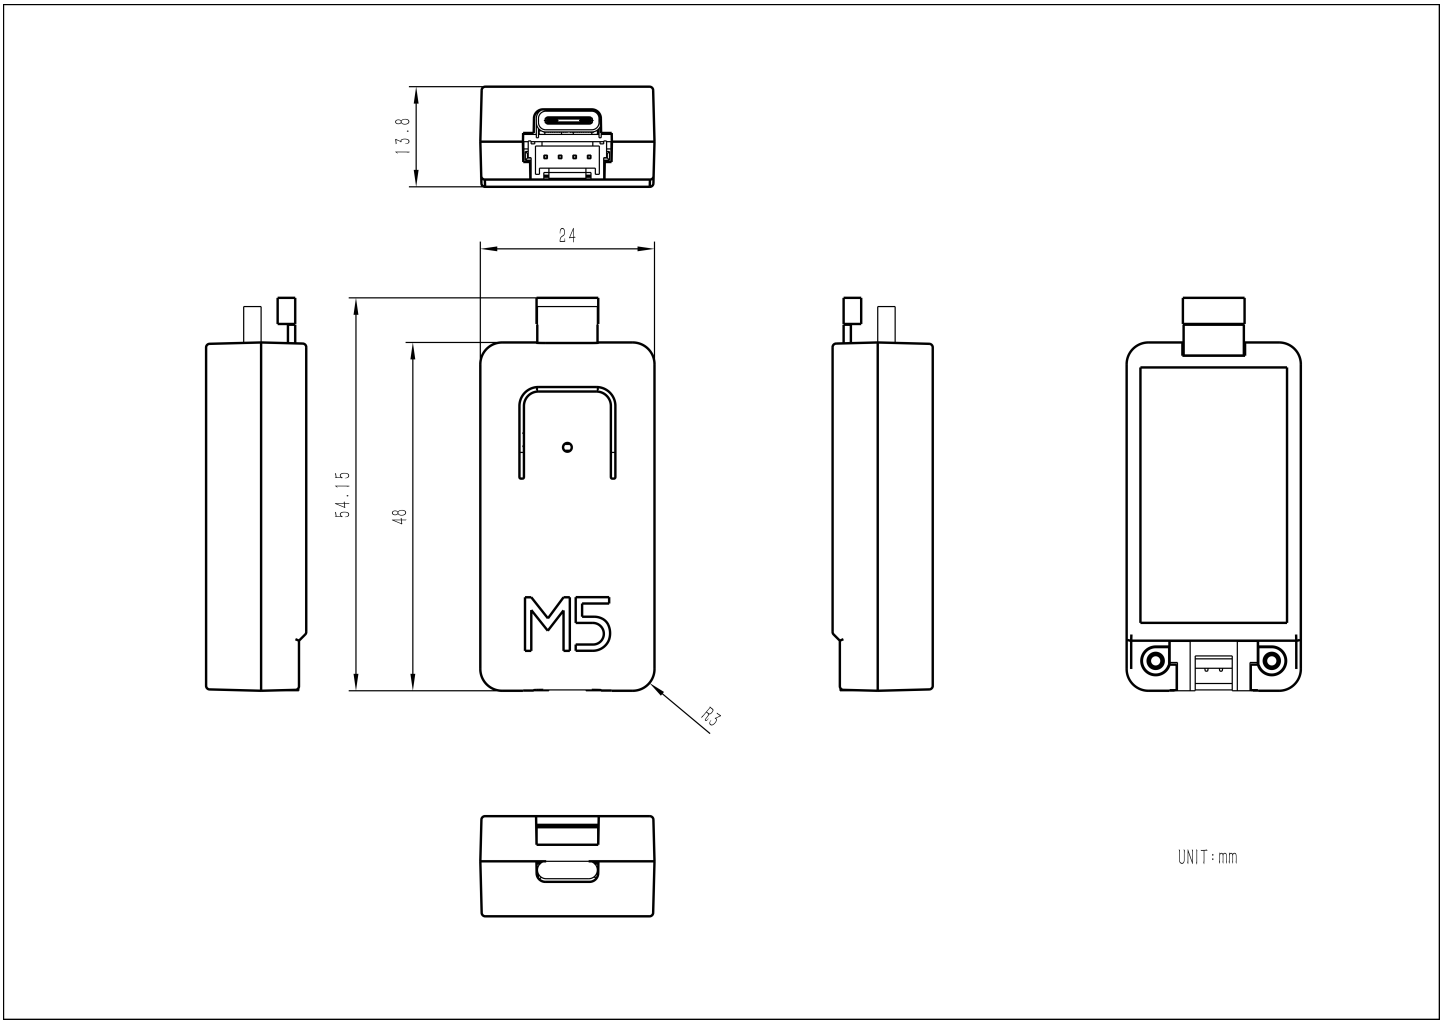

| Specification | Parameter |
| --- | --- |
| External Port | 1x GROVE |
| LED Indicator | 1x RED LED |
| USB Port | USB Type-C |
| Battery Capacity | 190mAh |
| Case Material | Plastic (PC) |
| Product Size | 55.0 x 22.0 x 14.0mm |
| Product Weight | 15.3g |
| Package Size | 136.0 x 92.0 x 23.0mm |
| Gross Weight | 17.6g |
