Unit TypeC to Grove

SKU:U151

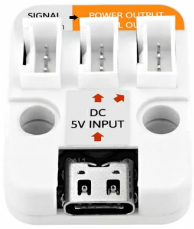

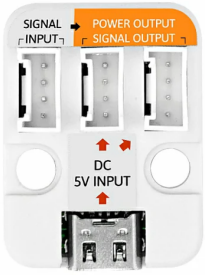

Description

Unit TypeC to Grove is a Grove splitter unit that connects **TypeC USB 5V** power supply. It draws power from the TypeC port as the power input, with the first Grove port used as the signal source, and the second and third Grove ports as combined outputs. This product is mainly used in scenarios where additional 5V power supply is required for the Unit.

Includes

- 1 x Unit TypeC to Grove
- 1 x HY2.0-4P Grove cable (20cm)

Applications

- LED strip power supply
- Sensor power supply
- Actuator power supply
- DIY projects
