Faces Calculator3

Description

Faces Calculator3 is a calculator input module designed for the Faces Bottom series.

The panel uses a 4 x 5 key layout, covering common numeric, operator, and function keys, making it suitable for interactive terminals with local computing capability.

The module communicates with the host through I2C and can provide numeric input, simple calculation, and result interaction functions.

Features

- Built-in STM32 MCU: STM32G031G8U6
- I2C communication interface
- Calculator key layout

Includes

- 1x Faces Calculator3

Applications

- Numeric input and calculation interaction
- Local calculation and parameter entry
- Teaching demos and prototype validation projects

Specifications

Item	Parameter
MCU	STM32G031G8U6
Communication Interface	I2C @ 0x08
Key Layout	4 x 5 calculator keys
Number of Keys	20 keys

Softwares

Internal Firmware

- Faces Calculator3 Internal Firmware
