Atomic ToChain Base

SKU:A163

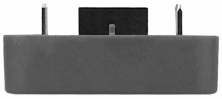

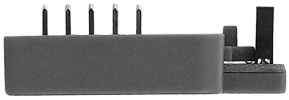

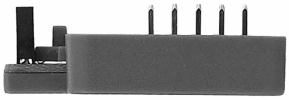

Description

Atomic ToChain Base is a Chain interface adapter board specifically designed for the Atom series controllers. It conveniently converts the Atom controller’ s bottom expansion I/O into a male HY2.0-4P connector, enabling easy access to M5Stack Chain series devices. The adapter board includes reserved solder pad designs, allowing flexible configuration of how the Atom bottom I/O is connected. With this adapter, users can achieve seamless extended connectivity between Atom and Chain series devices, unlocking more application possibilities.

Features

- Atom controller expansion for Chain devices
- Reserved solder pad design for flexible IO pin mapping

Includes

- 1 x Atomic ToChain Base
- 1 x Hex Key L-Shape 1.5mm (For M2 Screw)
- 1 x M2 * 6mm cap head machine screw

Applications

- Atom series controller Chain interface adapter board
