Module Plus

SKU:M019

Description

Module Plus is a feature-enhanced module in the M5Stack stackable module series. The module is equipped with a lithium battery (500mAh), a gear potentiometer, and an infrared emitter. It integrates the MEGA328, provides a microphone interface pad, and extends the ports PORT.B (GPIO) and PORT.C (UART) of the M5Core. Module Plus can upgrade your hardware resources and provide you with a better development experience.

Features

- 400mAh lithium battery
- Programmable gear potentiometer
- Infrared emitter
- PORT B & PORT C

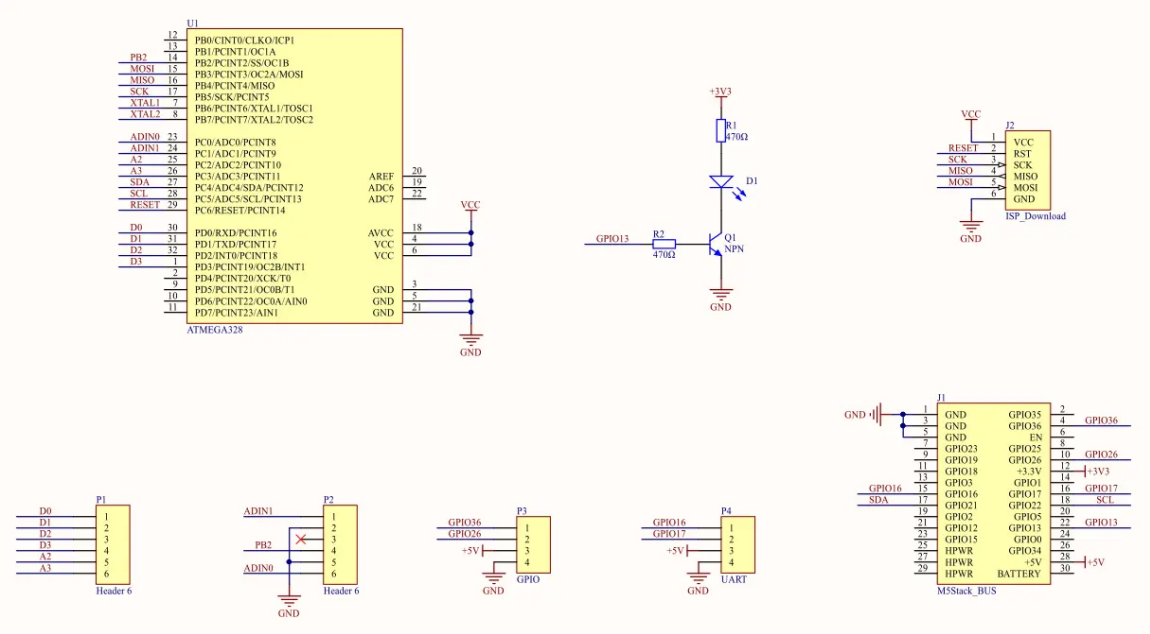

Includes

- 1 x Module Plus

Specifications

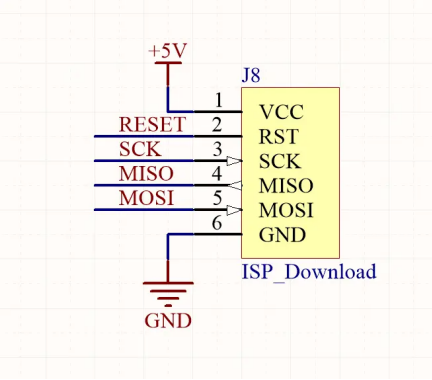

Specification	Parameter
Communication Interface	I2C Communication @0x62
Product Size	64.3 x 24.0 x 8.0mm
Product Weight	20.0g
Package Size	62.0 x 58.0 x 17.0mm
Gross Weight	30.0g
