Module13.2 Proto-Meas

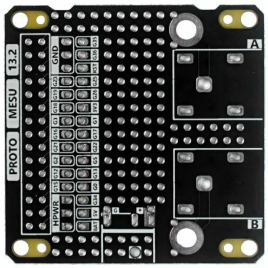

SKU:M033

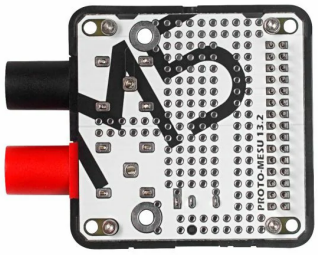

Description

Module13.2 Proto-Meas is a stackable DIY proto module designed for measuring current and voltage, equipped with multimeter probes and matching sockets, making it convenient for users to create a simple multimeter. The module has a height of 13.2mm, and its perforated board design helps users quickly build circuits. The board features a DC power socket for external power supply.

Features

- Stackable design
- Main hole size: 0.039" (1mm CNC drilled)
- Hole spacing: 2.54mm
- Dedicated DC power port and socket

Includes

- 1 x Module13.2 Proto-Meas
- 1 x M5-Bus
- 2 x Connecting wires
- 1 x Black probe and socket
- 1 x Red probe and socket
- 1 x DC 5V power socket
- 4 x M2*5mm self-tapping screws
- 1 x M2 hex wrench

Applications

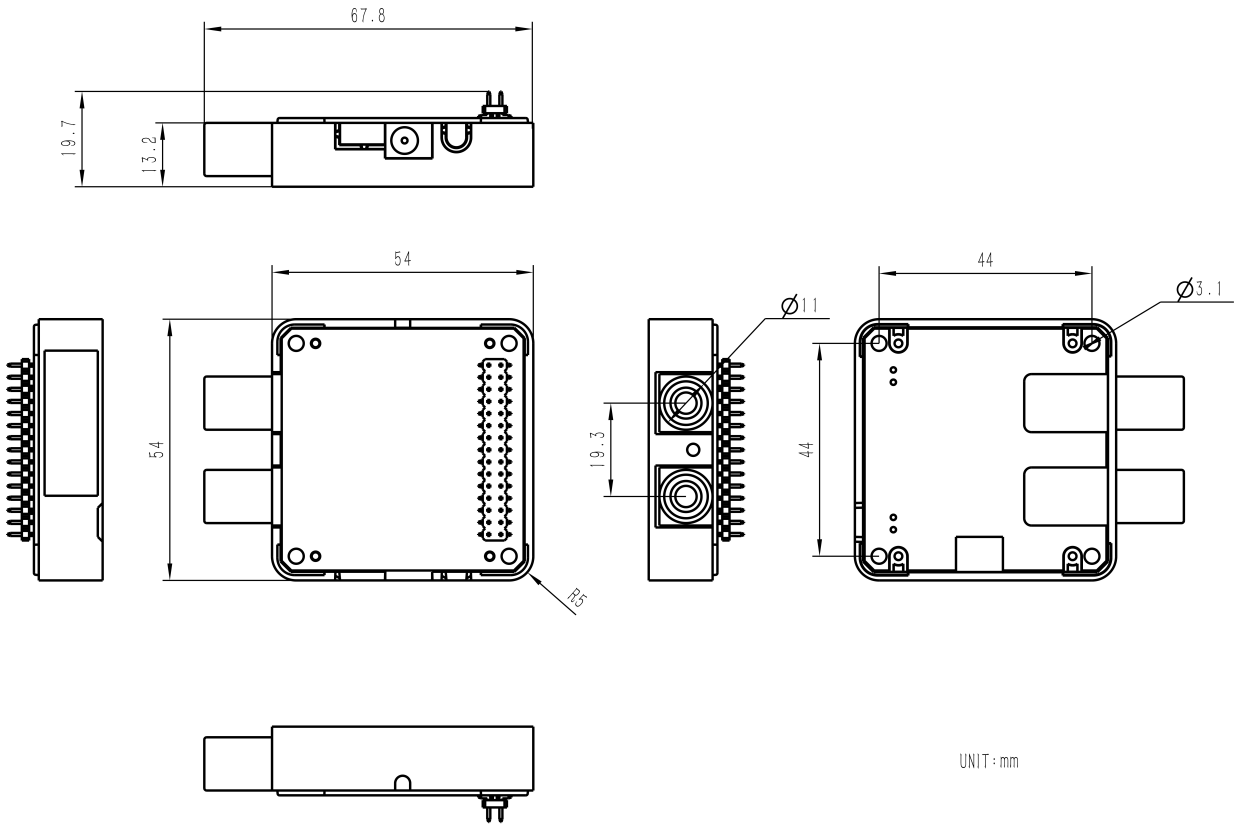

- DIY Multimeter

Specifications

Specification	Parameter
Net Weight	85g
Gross Weight	123g
Product Size	54 x 54 x 19.7mm
Package Size	105 x 65 x 40mm
Casing	PC
