Unit Dual Button

SKU:U025

Description

Unit Dual Button is a dual-button Unit that provides two physical buttons of different colors for you to operate. By detecting the high/low voltage changes of different button input pins, the button status can be determined. This Unit communicates with M5Core through the PORT B port.

Features

- HY2.0-4P interface
- Supports UIFlow and Arduino
- 2 x LEGO compatible holes

Includes

- 1 x Unit Dual Button
- 1 x HY2.0-4P Grove connection cable (20cm)

Applications

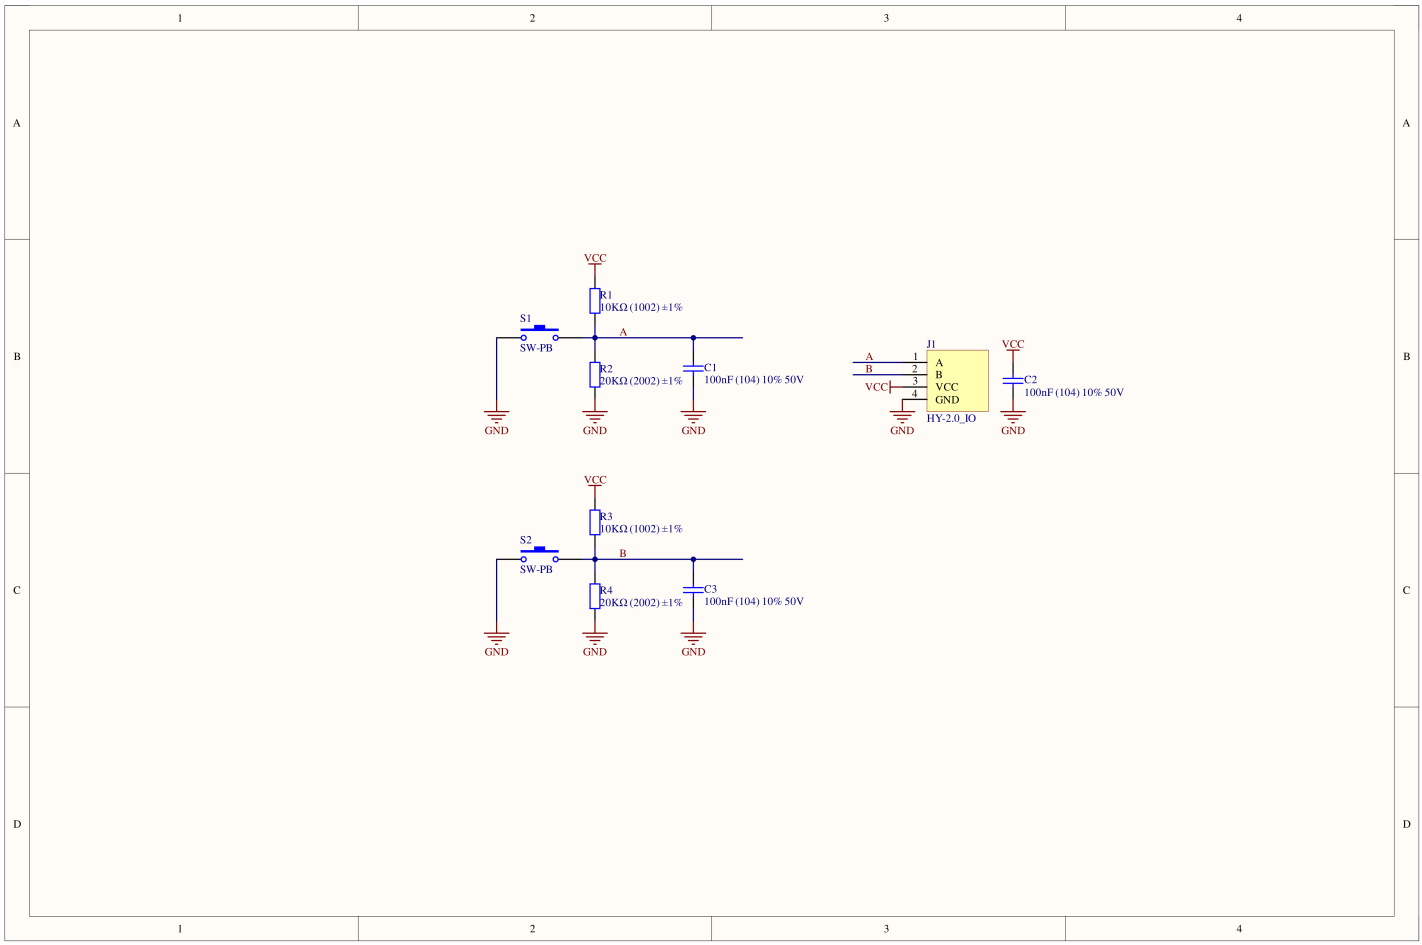

- Game controller
- Remote control switch

Specifications

Specification	Parameter
Net Weight	8g
Gross Weight	22g
Product Size	48 x 24 x 8mm
Package Size	136 x 92 x 10mm
