Module13.2 Battery

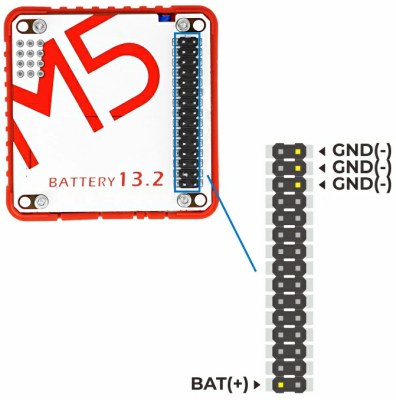

SKU:M120

Description

Module13.2 Battery is a **1500 mAh** high-capacity lithium battery expansion module in the M5Stack stackable module series. The battery integrates a Seiko protection board with a higher cutoff protection voltage, effectively preventing overcharge and over-discharge for safer operation. It supports stacking multiple battery modules, significantly extending device battery life.

Features

- Nominal capacity: 1500mAh (0.2C)
- Integrated Seiko protection board to prevent overcharge and over-discharge
- Supports stacking multiple battery modules to extend battery life
- Battery has passed multiple safety tests
- Laboratory test data:
  - Charging current 791mA, full charge time 110 minutes (Test hardware: Basic + Module13.2 Battery)
  - Discharge current 330mA, discharge duration 265 minutes (Test hardware: Basic + Module13.2 Battery + M5GO BOTTOM: built-in battery removed, RGB LED x10 on, maximum brightness)

Includes

- 1 x Module13.2 Battery

Applications

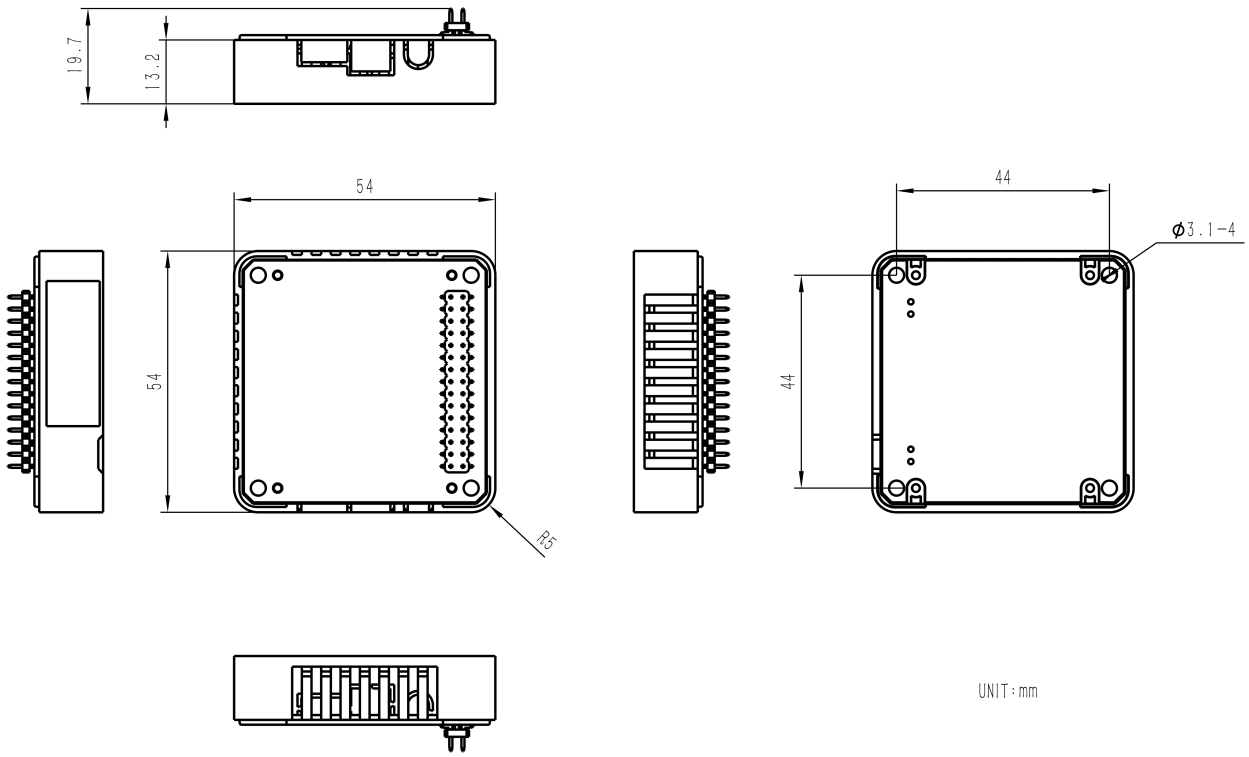

- Battery expansion

Specifications

Specification	Parameter
Nominal Capacity	1500mAh (0.2C)
Nominal Voltage	3.7V
Charging Voltage	4.2V
Discharge Cutoff	3.0V
Charging Current	Standard charging: 0.2C (300mA) Fast charging: 0.8C (1200mA)
Max Charge / Discharge Current	0.8C (1200mA)
Internal Resistance	≤150mΩ
Cycle Life	≥300
Operating Temperature	Charging: 5℃ ~ 45℃ Discharging: -10℃ ~ 55℃
Product Size	54.0 x 54.0 x 19.7mm
Product Weight	43.3g
Package Size	132.0 x 95.0 x 20.0mm
Gross Weight	63.7g
