Unit Mini Proto

SKU:U064

Description

Unit Mini Proto is a mini universal board Unit. You can freely design circuits on the board and connect it to M5Core through the HY2.0-4P port. If you plan to add simple circuits to your design and provide them with a reliable protective case, the Proto Unit is a good choice.

For different HY2.0-4P ports, you can connect different pins from the ESP32 for circuit connections.
