Servo Kit 180°

SKU:A076-B

Description

Servo Kit 180° is a 9g servo kit with a LEGO mounting bracket. The kit includes various servo accessories (servo wheels, axles, servo discs, etc.), making it easy to assemble and disassemble. The product is designed according to LEGO standards, allowing it to seamlessly integrate with LEGO series products, inspiring unlimited creativity. It can be directly connected using LEGO parts. This 180° servo is only used to control rotation angles from 0 to 180°. When using, please ensure the appropriate supply voltage to prevent stalling and avoid burning out the servo.

Features

- Micro servo system
- LEGO compatible
- Simple control
- Supports Arduino and UiFlow

Includes

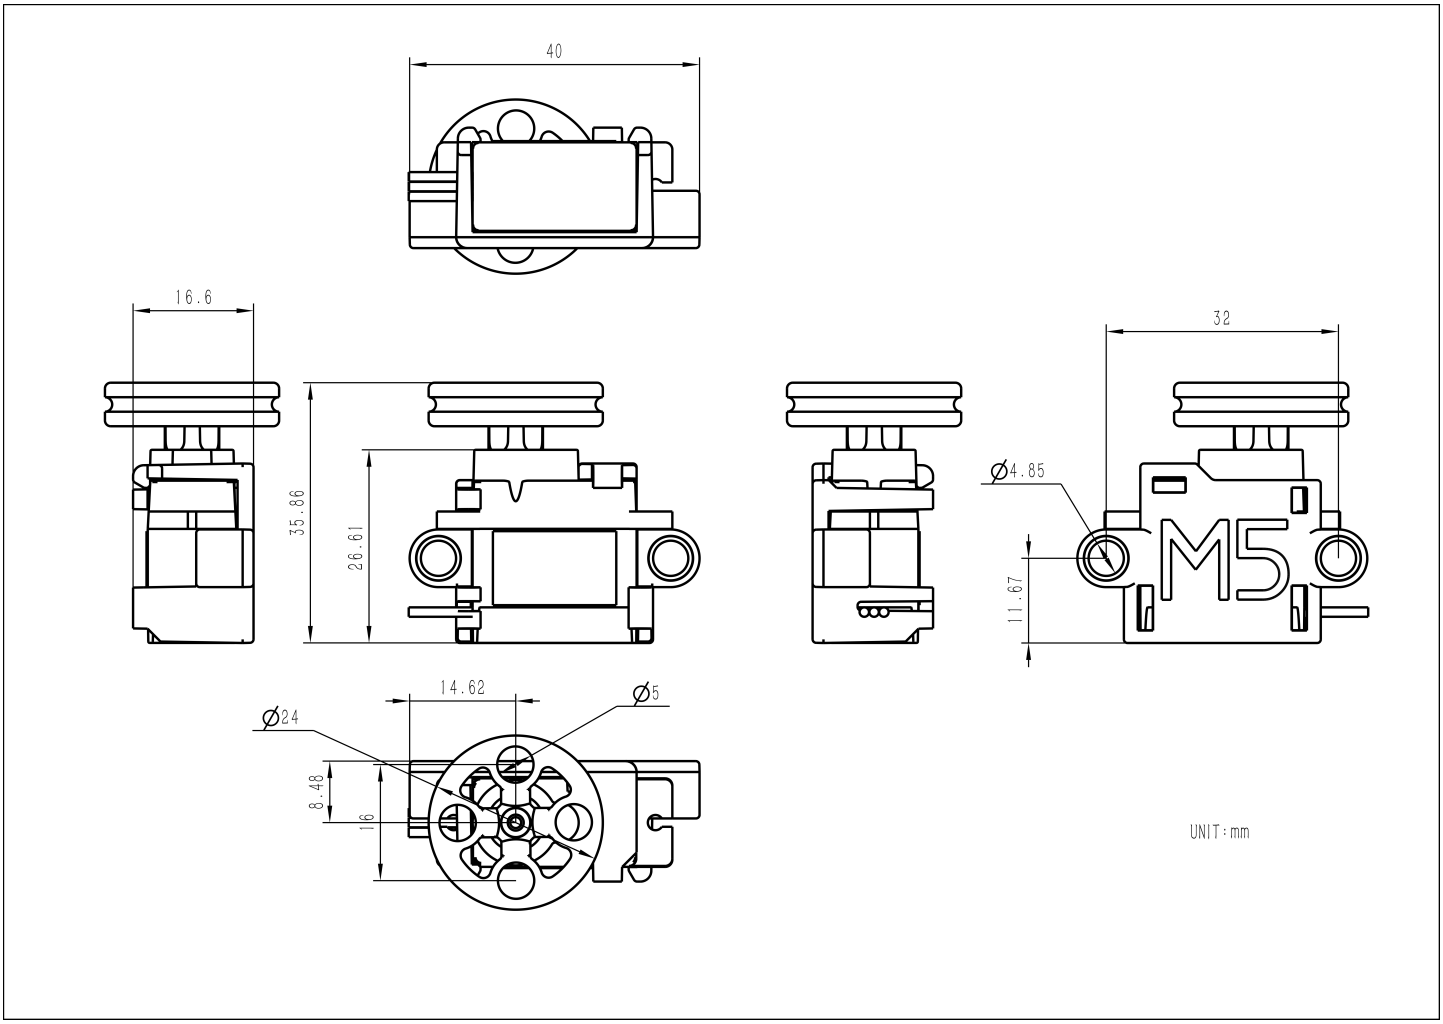

- 2 x SG90 Servo 180°
- 2 x Servo Wheels 24mm
- 2 x Hex Socket Head Self-tapping Screws M2*4mm
- 1 x Square Frame Beam Brick
- 1 x Servo Mounting Clamp A
- 1 x Servo Mounting Clamp B
- 2 x Servo Extension Cables 30cm
- 2 x Servo Disc Accessory Pack (includes several discs and screws)
- 2 x Servo Axles
- 2 x Grove to Servo Adapter
- 4 x Black Connector Pins

Specifications

Specification	Parameter
Gear Material	Metal motor gear, plastic gearbox
PWM Frequency	50Hz/0.5~2.5MS
Servo Weight	9.0g
Torque	1.6kg·cm/4.8V; 1.8kg·cm/6.0V
180° Servo Speed	0.1sec/60°/4.8V; 0.09sec/60°/6.0V
Stall Current	750mA
No-load Current	60mA
Gear Material	Metal motor gear, plastic gearbox
Cable Length	30mm
Deadband	8μm
Spline	20T
Voltage	4.8 ~ 6.0V
Product Size	40.0 x 12.0 x 36.0mm
Product Weight	48.6g
Package Size	170.0 x 120.0 x 25.0mm
Gross Weight	51.6g
