Stamp-S3 GroveBreakOut

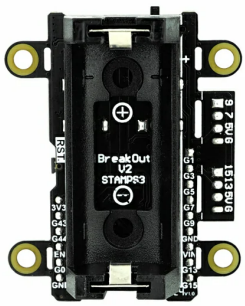

SKU:A144

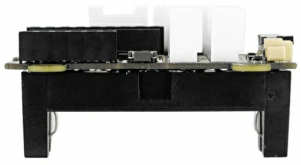

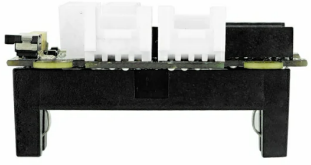

Description

StampS3 GroveBreakOut is an expansion board designed specifically for the Stamp-S3, equipped with 6 Grove interfaces, compatible with M5's portA/B/C standards (including I2C, IO (input/output), and UART interfaces). This expansion board features a built-in 16340/18350 lithium battery holder and a 1.25mm@2P lithium battery interface, allowing it to independently power the entire system. It also includes a battery power switch and a switch for toggling between USB and battery power. The onboard tactile switch is connected to the EN pin for

reset control. Additionally, the board includes a lithium battery charging chip, a 5V boost system, and a battery level detection circuit, providing a stable and reliable power solution. Pre-drilled mounting holes are available for easy installation. This product is suitable for education and prototyping, IoT projects, wearable devices, automation, and robotics.

Note

Compatibility

StampS3 GroveBreakOut only supports Stamp-S3 PIN1.27 specification

Features

- Multiple Grove interface compatibility
- Independent power system
- Charging and battery level detection
- Power switching and reset control

Includes

- 1 x StampS3 GroveBreakOut

Applications

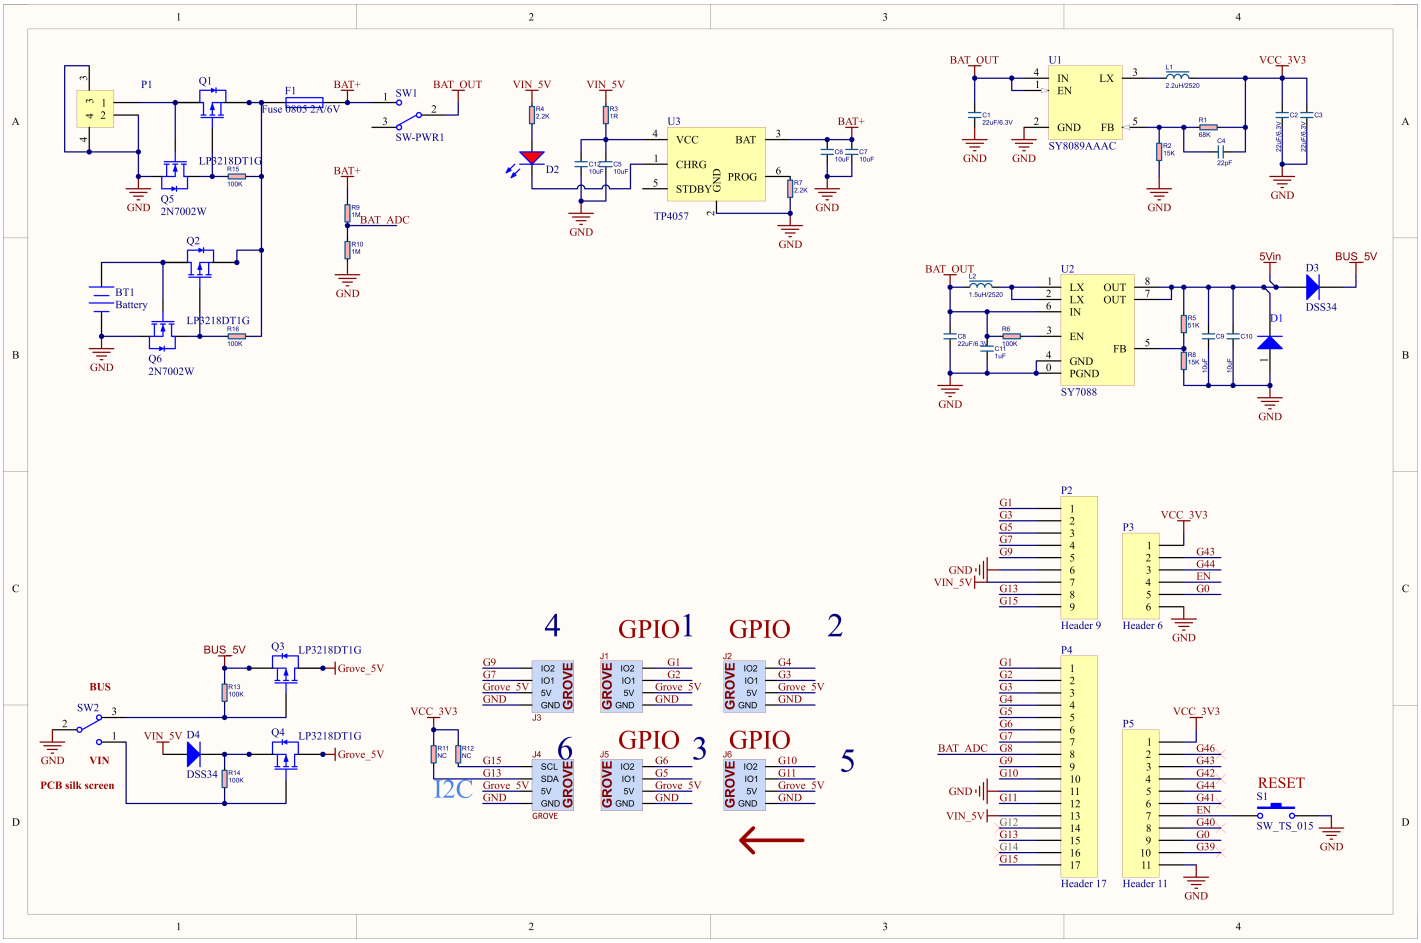

- IoT projects
- Wearable and mobile devices
- Education and prototyping
- Automation systems
- Robotics

Specifications

Specification	Parameter
Grove Interface	6xGrove(I2C/GPIO/UART)
Battery Type	16340/18350 lithium battery
Header Specification	1.27mm & 2.54mm
Lithium Battery Interface	1.25mm@2P
Grove Interface Specification	HY2.0-4P
Mounting Hole Size	3mm diameter
Operating Temperature	0-40°C
Product Size	47.5 x 38 x 23.2mm
Package Size	75 x 45 x 29mm
Product Weight	10.0g
Gross Weight	22.1g
